Community-Centered Facility – Researching Viability

Design and funding plans continue to be developed. An external consultant has been engaged to provide feedback and direction on data needed to develop funding proposals for grants and corporate sponsors. Previous community feedback surveys and progress made by various local groups to address the top priorities are a strong foundation to build upon. Work continues to develop the business case for this project.

Please continue to pray for guidance for the group and that their efforts are steered towards the best path forward for our community. Look for more information to come in the weekly bulletins.
